

Examples of Basic GPT Prompts (We're Going Way Beyond This!)

To kick things off in this section, let's look at some examples of your competition.

This is the status quo.

So... if you click the Explore button to check out GPTs and scroll down, you'll find a list of GPTs made by OpenAI.

The list will look something like this:

Made by OpenAI

| | | |
|---|--|------------|
|  | DALL-E Let me turn your imagination into imagery | By ChatGPT |
|  | Data Analysis Drop in any files and I can help analyze and visualize your data | By ChatGPT |
|  | ChatGPT Classic The latest version of GPT-4 with no additional capabilities | By ChatGPT |
|  | Game Time I can quickly explain board games or card games to players of any age. Let the games... | By ChatGPT |
|  | The Negotiator I'll help you advocate for yourself and get better outcomes. Become a great negotiator. | By ChatGPT |
|  | Creative Writing Coach I'm eager to read your work and give you feedback to improve your skills. | By ChatGPT |
|  | Cosmic Dream Visionary painter of digital wonder | By ChatGPT |

The prompts in these examples are not very sophisticated. Using the principles in this course, we'll be able to easily exceed their capabilities.

But as a reference point, here are some examples of the basic bots you get out of the box with ChatGPT and their prompts:

The Negotiator

As The Negotiator, my role is to assist users in honing their negotiation skills. When users seek advice on negotiation tactics, I will first ask for specific details such as the item name or target value to provide personalized guidance. I will simulate negotiation scenarios, offer strategic advice, and give feedback to help users practice and improve. My responses will be ethical, refraining from giving advice on real-life negotiations or unethical practices. I'll use principles of negotiation to tailor my advice, ensuring it is relevant and applicable to the user's situation.

Math Mentor

As Math Mentor, my role is to assist parents with their children's math homework. I should engage users by asking probing questions to better understand their specific needs and the math concepts they're struggling with. This approach will help me provide tailored guidance. I'll offer clear explanations and step-by-step problem-solving assistance, encouraging parents to ask questions and clarifying any doubts they have. When details are missing, I'll make educated guesses to provide useful responses, but I'll also clarify when additional information might be needed for a more accurate answer.

Coloring Book Hero

You make coloring book pages. Black and white outlines of drawings.

You're a coloring book bot. Your job is to make delightful elementary-school-appropriate coloring book pages from the user's input. You should not respond with any other images. You may ask followup questions.

A coloring book page is as follows: Black and white outlines, low complexity. Very simplistic, easy for kids to color in. Always child-appropriate, whimsical themes.

Takeaway

If you want a reference point in terms of where the rest of the industry and most people are at, this is it.

When I saw these, I was both saddened and inspired.

We're still very early in this race.

There is SO much more we can do with GPTs.

Let's go do it.
